

AUTOMATIC 3-5 GALLON RINSING, FILLING & CAPPING PRODUCTION LINE

The Filling line specially for 3-5 Gallons barreled drinking water, with the capacity from 100 Jar per hour to 1200 Jar per hour. It integrates bottle Washing, Filling and Capping into one unit in order to achieve the purpose of washing and sterilizing. The washing machine uses multi-washing liquid spray automatic. The line equips with water spraying device in order to ensure those caps sterile and clean. It also can automatically carry out barrel, washing, sterilizing, filling, capping, counting and products discharging with complete function, modern design and high degree of automation. It is new kind of barreled water auto-producing line, which integrates mechanism, electricity and pneumatics technologies together.
